

WS Technologies

Web Development Company

ADDRESSING YOUR Business Challenges

Web Application Development Services

WST is a web development company with over a decade of experience in building world-class B2B and B2C applications focusing on video delivery, RTC, AdTech, e-Learning, and data analytics.

Throughout these years, our dedicated web app developers have delivered products to over 400 clients, including global brands such as Google, Discovery, Vodafone, and Veon. Today, we use this tremendous experience to address the needs of the M&E, Healthcare, FinTech, and Sports industries.

R&D & Consulting

Our R&D team learns the ins and outs of your business to help you reduce both technical and market risk across the entire software development lifecycle.

Front-End Development

We absorb your requirements and build a trusted, visually rich user-product relationship to boost adoption and satisfaction. Our front-end team takes it from there to nail that ultimate user journey in code.

Back-End Development

Let WST's architects and senior engineers get to design and build the core of your application — with an eye for availability, robustness, and great new features.
